2nd ANNUAL INTERNATIONAL HEART FAILURE CONFERENCE

24th-25th November, 2016 | InterContinental Hotel, Abu Dhabi, UAE

Accredited by HAAD
for 14.25 CME Hours

Under the auspicious of

WELCOME NOTE

Dr. Samer Ellahham

Dear Colleagues,

On the behalf of the scientific Committee, it gives us immense pleasure to invite you to the "2nd International Heart Failure Conference from Prevention to Treatment" to be held at InterContinental Hotel in Abu Dhabi, UAE, on 24-25 November, 2016

The Conference has been designed to provide an innovative and comprehensive overview of the latest developments in cardiovascular medicine, as well as responses to the most debatable issues primarily in the areas of the prevention, diagnosis and management of heart failure, coronary artery disease, cardiac arrhythmias, stroke, acute coronary syndromes, hypertension, diabetes and metabolic syndrome.

The two days event will bring together the foremost thought leaders and experts in cardiovascular medicine from the UAE, the region and all over the world to discuss strategies for disease remediation for heart, Heart Failure, Electrocardiography, and Nuclear Cardiology. These distinguished cardiologists and scientists will present data in the form of plenary sessions, symposia, oral presentations and posters and will include superb scientific material that will be carefully selected by the Scientific Abstract Review Committee. The conference will be organized around the theme "From prevention to treatment".

Moreover, an important feature of this conference is its case panel discussions. One of our frequent challenges is making practical use of knowledge. Therefore, the program format will include case presentation discussion sessions with a multidisciplinary panel of experts from medical and surgical disciplines, discussing diagnostic and management controversies. Among areas of focus for these panels will be cardiovascular prevention, coronary artery disease, dyslipidemia, myocardial infarction, hypertension complications, diabetes and metabolic syndrome, heart failure imaging, biomarkers, renal dysfunction, lipid disorders, obesity, quality of life and many more

The meeting will offer a superb opportunity for physicians, medical specialists and all healthcare professionals to attend expert updates and to share and exchange best practices and experiences in cardiovascular and related diseases.

We hope that you will enjoy the Congress and that your interaction with your colleagues from many different countries will stimulate a creative exchange of ideas that will be personally rewarding. We also hope and trust that you will enjoy your visit to the very beautiful city of Abu Dhabi, in November 2016.

Abu Dhabi, UAE

LEARNING OBJECTIVES

Upon completion of this educational activity, participants will be able to:

- Review the latest evidence to prevent heart failure including lessons learned from genetics and biomarkers
- Discover the latest diagnostic and treatment recommendations for heart failure with reduced and with preserved ejection fraction
- Describe the latest recommendations and emerging interventional therapies for heart failure
- Outline surgical strategies for patients with advanced heart failure including heart valve repair and/or replacement, mechanical circulatory support (acute or durable), and heart transplantation
- Examine aspects of heart failure that address decision making, support systems, caregiver issues and advanced therapies
- Explore future directions in heart failure including big data analytics, right ventricle circulatory support, and gene therapy care in daily practice

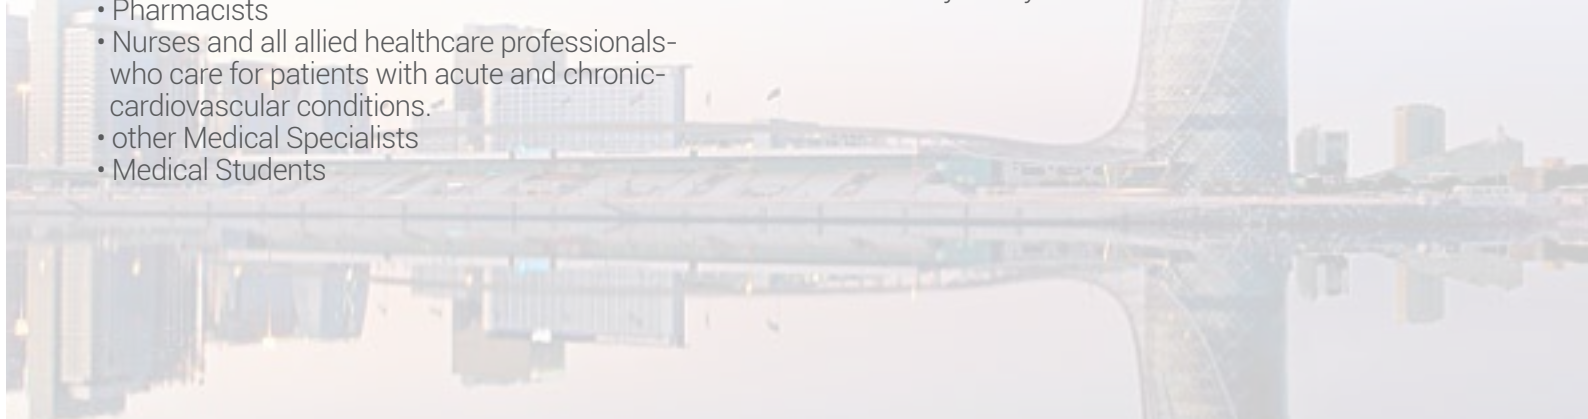

WHO SHOULD ATTEND

This conference is intended for:

- Clinical Cardiologists
- Cardiac Surgeons
- Pediatric Cardiologists
- General Internists
- Cardiovascular Interest
- Primary Care Physicians
- General Practitioners,
- Family Physicians
- Radiologists
- Emergency Medicine
- Nephrologists
- Nutritionists
- Geriatrics,
- Pharmacists
- Nurses and all allied healthcare professionals- who care for patients with acute and chronic- cardiovascular conditions.
- other Medical Specialists
- Medical Students

HIGHLIGHTED TOPICS

- Advances in heart failure prevention
- State-of-the-Art reviews: Heart failure with reduced ejection fraction incorporating the latest approved therapies for heart failure; Heart failure with preserved ejection fraction; and newly approved device therapies for heart failure
- An update on percutaneous treatment of valvular heart disease
- A glimpse of future therapies including gene therapy for heart failure
- Coronary artery diseases
- Dyslipidemia - Obesity
- Myocardial infarction
- Hypertension complications
- Diabetes and metabolic syndrome
- Heart failure imaging
- Biomarkers
- Renal dysfunction
- Lipid disorders
- Overweight/Obesity
- Novel heart failure therapies
- Cardiogenic shock: how can we improve prognosis?
- Individualising therapy in heart failure
- Devices in acute heart failure
- How to manage acute right ventricular failure
- Challenges in the management of heart failure
- Cancer and heart failure
- Organ dysfunction in acute heart failure
- Management of atrial fibrillation in heart failure
- Imaging technique in the decision making of heart failure
- Post myocardial infarction: what should be done to prevent heart failure
- Challenging clinical scenarios in heart failure
- Tele-medical management and remote care in heart failure
- What a clinician should know about heart failure with preserved ejection fraction
- Biomarkers in heart failure: what's new?
- Mitral and Tricuspid valvular interventions in heart failure
- Cardiomyopathies: what are the mechanisms?
- Sleep breathing disorders in heart failure
- Imaging in heart failure: what does the future hold?
- Cardiac challenges during pregnancy
- Patient journey in acute heart failure
