

Leading Endoscopic Diagnosis and Treatment for Early Colorectal and Gastric Cancer

February 24, 2017 | Intercontinental Hotel, Abu Dhabi, UAE

Supported by:

Accredited by HAAD
for 2 CME Hours

Welcome Message

Dear Colleagues,

On behalf of the scientific committee, we have the pleasure to invite you to attend a seminar on **“Leading Endoscopic Diagnosis and Treatment for Early Colorectal and Gastric Cancer”** that is scheduled to be held at Intercontinental Hotel, Abu Dhabi on Friday **February 24th, 2017**.

Colorectal and Gastric Cancer is the fourth most common cancer worldwide and the second leading cause of cancer death. With the raised public awareness on early diagnosis and treatment of cancer as well as the development of endoscopic imaging and image enhanced techniques, such as Magnifying Endoscopy, the proportion of early gastric cancer (EGC) at diagnosis is increasing. Early detection is essential for effective diagnosis and treatment of early gastric cancer.

The program aims to discuss the latest endoscopic diagnostic and treatment of early colorectal and gastric cancer through a high level scientific content and state-of-the-art- lectures delivered by prominent speakers and experts in their fields from Leading Medical Institutes in Japan in a highly interactive and impactful way so that you can acquire new knowledge and skills that you can apply at your practice.

The event serves as a dynamic meeting which promotes engaging discussion, information sharing, experience-based perspectives and productive clinical debates between practicing physicians and researchers on the latest recommendations and emerging interventional therapies for endoscopic diagnostic and treatment of early colorectal and gastric cancer

This meeting will offer a superb opportunity for physicians and medical specialties to attend expert updates and to share best practices and experiences and to network with new and established colleagues, creating and strengthening clinical collaborations.

We take this opportunity to welcome your participation in this unique scientific event in order to improving the well-being of our patients.

Dr. Mazen Taha

Chair, Department of Medicine
Chief, Gastroenterology & Hepatology
Tawam Hospital, Al Ain, UAE

Learning Objectives

Upon Completion of this educational activity, participants should be able to:

- Describe Magnifying Endoscopy as an effective diagnosis of early gastric cancer (EGC).
- Discuss gastroscopy to be a significant role to detect and diagnose early gastric cancer (EGC).
- Explain Endoscopic Submucosal Dissection (ESD) providing excellent short and long-term outcomes preserving stomach function.
- Describe Pit Pattern Diagnosis including “Non-neoplastic”, “Non-Invasive Pattern”, and “Invasive Pattern”, respectively.
- Explain the clinical outcomes of Endoscopic Mucosal Resection (EMR) and Endoscopic Submucosal Dissection (ESD).

Target Audience

- Gastroenterologists
- General Surgeons
- Endoscopy
- Radiologists
- Pathologists
- Internists
- Oncologists
- General Practitioners
- Family Physicians

Speakers

Dr. Seiichiro Abe

Dr. Seiichiro Abe M.D. graduated from Sapporo Medical University in 2002. He completed his short-term and chief residency training at the Endoscopy Division, National Cancer Center Tokyo, Japan.

Dr. Abe specializes in the endoscopic diagnosis of early gastrointestinal cancer using image enhanced and magnification endoscopy in addition to advanced endoscopic therapy including endoscopic mucosal resection (EMR) and endoscopic submucosal dissection (ESD) for esophageal, gastric and colorectal cancers. His role at the National Cancer Centre involves managing patients both in the outpatient and in-patient setting in addition to being an attending doctor in the endoscopy center performing many complex EMR/ESD procedures.

Dr. Abe is an international educator in advanced endoscopy. In addition to training Japanese endoscopy trainees, he also teaches advanced endoscopic techniques to overseas endoscopists through international hands-on training and live demonstration.

Dr. Yutaka Saito

Dr. Yutaka Saito is the Director of the Endoscopy Division at the National Cancer Center Hospital, Tokyo, Japan. He also has served as an attending associate Professor of Gastroenterology at Tokyo Medical University since July 2008.

Dr. Saito is licensed as a Board certified fellow of the Japanese Society of Gastroenterology, the Japan Gastroenterological Endoscopy Society, the Japanese Society of Internal Medicine and the Japanese Gastroenterological Association and fellow of the American Society for Gastrointestinal Endoscopy.

He is also certified as a Foreign Trainee Doctor Clinical Instructor and has served as one of the Editors of the World Journal of Gastroenterology since 2007 in addition to being a member of the American Society of Gastrointestinal Endoscopy.

Dr. Saito has been invited to perform as a faculty member and live demonstrator in numerous countries. He was honored for an invited professor at Mayo Clinic, Rochester, Minnesota and Jacksonville, Florida in 2010. He was also commended for Basil Hirschowitz Master Endoscopist Award for advancing the art and science of endoscopy throughout the world in 2013 and Certificate of appreciation of Outstanding Reviewer for GIE: Gastrointestinal Endoscopy 2015-2016.

He is now one of the members of International Editorial Board of Gastrointestinal Endoscopy.

He has a wide spectrum of research exposure and interests including

1. Chromo-magnification Colonoscopy;
2. Endoscopic Mucosal Resection and Endoscopic Submucosal Dissection for early gastrointestinal cancer and
3. Colon capsule endoscopy

Scientific Program

09:00 – 10:00	Registration
10:00 – 10:05	Welcome Note - Dr. Mazen Taha
10:05 – 10:50	Current Endoscopic Diagnosis and Treatment of Early Gastric Cancer - Dr. Seiichiro Abe
10:50 – 11:00	Coffee break
11:00 – 11:45	Endoscopic Diagnosis Using JNET Classification and Treatment for Early Colorectal Cancer - Dr. Yutaka Saito
11:45 – 12:15	Panel Discussion
12:15 – 14:00	Lunch Session
