Welcome Message

Dear Colleagues,

On behalf of the scientific committee, it's our immense pleasure to invite you to the **"3rd International Emirates Conference on Minimally Invasive Surgery & NOTES"** that is planned to be held at Rosewood Hotel in Abu Dhabi, UAE on **12-13 May, 2016**.

The past 20 years have witnessed an extraordinarily rapid adoption of minimally invasive surgical techniques, and increasingly these techniques are being employed in the diagnosis and treatment of a wide range of malignancies.

This two-day program is designed to serve as a unique and comprehensive overview of the current status of minimally invasive surgery in oncology patients and in addition offers valuable insights into the future of this constantly evolving field.

The conference will greatly expand your understanding of the development and use of new minimally invasive technologies and techniques to diagnose and treat many types of cancer including gastrointestinal, lung, and prostate cancers. Minimally invasive surgery is an effective approach to removing some cancerous tumors and lymph nodes, all the while sparing the patient from unnecessary tissue damage, pain, and scarring.

The event will feature a faculty of leading experts in this field. The Meeting consists of updates of multiple topics, plenary sessions; expert review and discussion of surgical oncology videos and hands on clinical practice workshops performed by master surgeons. There will be endless opportunities for the participant to learn from the "giants" who write the articles and shape the future. This unique event is a fertile ground for the development of academic and research relationships that are sure to advance the practice of surgery for all involved.

The video session will bring panels of Master Surgeons together to show you the finer points of their techniques and to discuss how to handle different surgical oncology cases with attention given to lessons learned and appropriate action/reaction. The academic excellence of a distinguished faculty and state of the art technology will be combined to bring an exceptional educational opportunity to help our surgeons to provide better patient care.

The event will also provide an Exhibition that will feature the latest in products and services designed by leading manufacturers.

We invite you to participate in this scientific meeting and have a unique opportunity to network with your peers and keep abreast of the latest developments in Innovative Minimally Invasive Surgical Oncology.

We look forward to welcome you in Abu Dhabi.

Please do not miss this outstanding opportunity!

Conference Objectives

- Upon completion of this international conference, participants will be able to:
- Review current state of the art advances in minimally invasive surgical Oncology.
 - Identify endoscopic-surgical oncology procedures.
 - Learn about interdisciplinary implementation of surgical oncology | innovations.
 - Discuss Hot topics in malignant conditions
 - Discuss Hot topics in Benign conditions

Highlighted Topics Include

- Hot topics in Benign conditions
- Hot topics in malignant conditions
- Surgical Oncology
- Update laparoscopic approaches in surgery, gynecology, urology
- The Evolution of Minimally Invasive Colorectal Surgery
- Innovation, Robots
- Controversies in Bariatric Surgery
- Better Outcome in Cancer Patients
- Hands-on Workshops

Target Audience

- Surgeons
- Gynecologists
- Urologist
- Gastroenterologists
- Internal Medicine Specialists
- Biomedical Engineers
- Oncologist
- Pathologists
- Radiologist
- Family and primary care Physicians
- Nurses
